We did a Plunket Course on Promoting Good Health in Young Children. It is very interesting and hard at the same time. Wendy is the instructor for the course. She has two young children that she brings with her and it is hard work teaching and looking after her children at the same time!

By Claudia

Horticulture is learning about plants and the environment. We are learning how to keep the plants healthy and knowing what plants are safe to grow in the winter. We found out how to grow vegetable plants and Horticulture also teaches children to respect plants and the environment

On Wednesday, Thursday and Friday some girls went to a hairdressing course at the Polytech in Nelson. We practised on some manikins and then on each other. Then before we knew it, it was almost the end of the day. Then we went to our school assembly to show our hairstyles to everybody. I really did enjoy myself at the hairdressing course.
